

W3C CSS Work Group

PUBLIC WEB SITE

Mon Dec 17 2007

developed by
BRIGHT EYE MEDIA
www.brighteyemedia.com

Version one present a large introductory area at the top of the main page with modules underneath to allow access to the most recent Work Group activities and recent CSS content on the Web.

1 Fixed Header

The header will remain fixed at the top of the browser window for quick navigation and search access. The header elements will stack ass needed for narrower browser widths.

2 Language selection

Users can switch to other languages to view the site.

3 Specifications Quick Links

Provides the major links to the CSS specifications and profiles. This could be used instead for quick-links to testing pages or other important areas of the site.

4 Introduction

Cntroductory text underneath that helps guide first time visitors.

5 What's New

Important news about the Work Group. This list will *not contain* general CSS information links anymore.

6 Current Work

Overview and links to most recent status updates on Work Group projects.

7 The World of CSS

Links to General CSS related articles and information not associated with the CSS WG site.

8 Footer

Redundant navigation links and other "small print" info.

The World of CSS »

2007-10-31 Kei Kubo released the 1.0 beta version of CSSEZ, an online CSS authoring tool that has many layout templates, background image maker, and other features. Requires Javascript. (Safari, Firefox, Internet Explorer; free; in Japanese)

2007-10-08 For those who find the CSS grammar rules difficult to read, Rikkert Koppes has made visual "railroad diagrams" of the syntax of CSS.

2007-10-08 Andy Clarke (graphic designer and member of the CSS working group) announced the "CSS Eleven," a group of Web developers and designers who intend to explain and illustrate the various CSS modules as they are developed.

2007-09-05 Westciv again started its (free, self-paced, on-line CSS level 1 course. Already in June, but the announcement here got lost ☺)

Bert Bos, CSS contact

Created 22 Jan 2004. Last updated 2007-05-29 | 09:55:31

The design uses a cool color palette with subtle gradients to contrast the hot Red links. All text, with the exception of the W3C log is Rendered in HTML. The columns will also be able to "break, so that the page will render at a min-width of 250px.

The fonts used are Georgia and Verdana.

7 **FOOTER**

This version would present a relatively new paradigm in main page navigation, placing the main navigation points in separate modules with descriptive text underneath linking to sub-sections. The module height will depend on the amount of text in the module.

1 **Fixed Header**

The header will remain fixed at the top of the browser window for quick navigation and search access. The header elements will stack as needed for narrower browser widths.

2 **Topic Overviews**

Each main navigation point is presented as the header to a module with text and hypertext underneath to section links

3 **Specifications Quick Links**

Provides the major links to the CSS specifications and profiles. This could be used instead for quick-links to testing pages or other important areas of the site.

4 **Language**

Visitors can choose to view site in one of several different languages.

5 **What's New and CSS on The Web**

Important news about the Work Group. This list will *not contain* general CSS information links anymore.

6 **CCSS on The Web**

Links to General CSS related articles and information not associated with the CSS WG site.

7 **Footer**

Redundant navigation links and other "small print" info.

900 px

The screenshot shows the W3C CSS website with a three-column layout. The top navigation bar includes 'W3C CSS' and links for 'ABOUT', 'SPECS', 'TEST', 'USE', 'DISCUSS', and 'CONTRIBUTE', along with a search box. The central column features the title 'cascading STYLE SHEETS' and a list of links: 'the SPECS', 'Overview', 'CSS Level 1', 'CSS Level 2.1', 'CSS Level 3', and 'Profiles Mobile 1.0 | Print | TV 1.0'. Below this is a 'What's New' section with several news items, each accompanied by an RSS icon. The left sidebar contains sections for 'ABOUT', 'DISCUSS', and 'CONTRIBUTE'. The right sidebar contains sections for 'USE' and 'TEST'. The footer includes a photo of Bert Bos, the CSS contact, and a 'MADE WITH' logo for Cascading Style Sheets, W3C CSS, W3C HTML 4.0, and CSS.

This version uses a neutral color palette—borrowed the current sites palette—and a large background image that shows through the transparent background modules. The Central Column can reduce to 250 pixels minimum width with the left and right column stacking beneath it to accommodate narrower browser widths.

The fonts used are Georgia and Arial/Helvetica.
